Company history

SM Software Technology is a company, founded in 2007 in New Jersey, USA. We design, develop and sell software for casinos, betting shops and lotteries.

The company has developed a full range of gaming content, which includes poker, Keno, Bingo, Fortune, pre-recorded videos of horse, greyhound and camel races, exciting themed slots, fish shooting, table games, roulettes, Telegram casino and online casino platform. The company began its operations in Europe: Sweden, Switzerland, Italy, Serbia, Russia, Ukraine, Kazakhstan, Kyrgyzstan and Armenia in the B2B segment.

SM Software Technology games and products received approval reviews from owners of gaming and bingo halls, casinos and online gambling operators. As a result, it increased brand awareness and This has enabled to start exploring new markets. In 2014, the company opened an office in Lima, Peru.

Since 2017, the company's representatives have been taking active part at major exhibitions in Latin America. Now they operate successfully in Peru, Colombia, Ecuador, Argentina, Chile, Haiti, Dominican Republic,etc. In early 2018, the company began operating in Africa. Our products is widespread and growing in Cameroon, Kenya, Uganda, Tunisia, Mozambique, South Sudan and other countries due to their technical flexibility and approach to customer focus.

Today SM Software Technology has a solid track record of cooperation with more than 100 projects. Working in a highly competitive environment, we differ from others in that we have shown our ability to create high-quality games of various types.

Their successful implementation is possible thanks to a team of professionals of the highest level, ready to solve any task assigned to it.
